

Our Mission: To connect everyday people to the stocks that matter today with the information that matters tomorrow.

Requirements:

- Web Application (website)
 - HTML, JSON, Javascript, maybe java
 - Integrate with google firebase (win prize)
 - Buy a domain from domain.com (win prize)
- Parsing websites for specific keywords
 - Parse websites for keywords such as “buy ‘this’”, or “sell ‘that’”, or “STAY AWAY FROM ‘this’”
 - EXAMPLE of SNAPCHAT: If a negative keyword is associated with the Snap stock in a website, add a “-1”. If a positive keyword is associated with the Snap stock in a website add a “+1”.
When the parsing is complete, total all of the positive and negative keywords.
 - If snap totaled to -39 and uber totaled to +105, rank uber above snapchat. If Google ranked +89, rank it in the middle.
 -
- Websites to use for parsing for keywords:
 - The Biggest Gainers
 - <https://finance.yahoo.com/gainers?offset=0&count=100>
 - The Biggest Losers
 - <https://finance.yahoo.com/losers?offset=0&count=100>
 - Trending Stocks
 - <https://finance.yahoo.com/trending-tickers>
